

My husband and I are truck drivers and before xm radio came along we had several incidents of running into bad weather and road conditions. Now we can keep up to date on all the national news and weather plus local weather and traffic in whatever major city we happen to be going thru. The NAB petition 04-160 in my opinion has no right to stop me from receiving whatever station I want, since it is a service that I pay for. Next thing you know they will be telling us that we can't get these stations on our sattelite tv which we also pay for. If I want to listen to static then I will listen to AM/FM radio. There are very few stations that reach over 50miles and when you travel 1,000+ miles a day it is really great to know that I can hear the weather all across the country and not miss the main part of it because I lost the station and have to try to find another one. Again we pay for this service, why shouldn't we be able to keep it? I urge you to reject the petit! ion.

Sincerely,

Steve & Vivian Bailey
